Having troubles downloading WIPO Sequence?

Problem

Several users have indicated they are no longer able to download the .exe Windows installation package from the WIPO Sequence website, if they simply click on the link.

Solution

Chrome has started to block non-secure downloads from HTTPS websites, particularly for high risk filetypes like .exe files.

In order to proceed with the download:

- 1. Right click on the link of the executable file and select 'save link as'.
- 2. Select a download location from the file dialog and then the file should start downloading.
