

Q: Why are all the applicants in my project not appearing when I generate/print my sequence listing?

Why are all the applicants in my project not appearing when I generate/print my sequence listing?

According to the [WIPO Standard ST.26](#), paragraph 45 only one applicant should appear in the sequence listing (in the general information section).

WIPO Sequence Tool will include the indicated 'Primary Applicant' in the generated XML sequence listing. Also, when printing the project, only the primary applicant will be displayed.
