

SCIT.ATR.PI.2007.SK

Annual Technical Report 2007 on Patent Information Activities submitted by Slovakia (SCIT /ATR/PI/2007/SK)

Where URLs are requested below, it is preferred that either URLs which are likely to remain stable over time (three years or more) are provided, or home (main) page URLs are provided with a short explanation of how to access the corresponding information.

The term "patent" covers utility models and Supplementary Protection Certificates (SPCs). Offices which issue design patents should report their design patent information activities in their Annual Technical Reports on Industrial Design Information Activities.

I. Evolution of patent activities

Changes experienced in terms of application filings and grants with respect to the previous year

Patents

There were 345 patent applications filed in 2007 that is increase by 21.9 % in comparison with the year 2006. The PCT applications form 20 % (69) of all applications.

The number of applications filed by domestic applicants (239) has increased by 23.8 %, and the applications filed by the foreign applicants (106) also increased by 17.8 %.

The largest share in the number of patent application filed by foreign applicants (106) have the The USA (23), Germany (20) and The Czech Republic (18).

In the year 2007, 3 European applications were filed.

574 patents were granted that is increase by 5.7 % in comparison with the year 2006.

There were 10 application of SPC's filed in 2007. All of them are from foreign applicants, the most number is from the USA - 3, from Germany - 3 applications and from Suisse-3 applications. There were 13 SPC's granted.

On December 31, 2007 there were 4,266 valid patents in the Slovak Republic.

Utility models

There were 321 utility model applications filed in the Office in 2006. This number has decreased by 6.1 % in comparison with the previous year. The number of applications filed by the Slovak applicants decreased by 8 % (252 applications). The share of the Slovak applicants in total number of 321 applications is 78.5 %. Increase of 20 % occurred in number of registered utility models (332).

On December 31, 2007 there were 1,814 valid utility models in the Slovak Republic.

In comparison with the statistics of the years 2001 - 2007, there are following results in patent and utility model area:

[Patentandutilitymodelstatistics](#)

Trends or areas experiencing rapid changes with respect to the previous year

Patents

Application in the field of Health and Amusement (16.2 %), Medical, Dental or Hygienic Preparations (8.4 %), Transporting, Conveying and Storing (8.1%), Measuring, Optics and Photography (6.9 %) and Organic Chemistry (6.1 %) have the largest share.

Utility models

Almost 24 % registered utility models are from the branch of civil engineering and transport.

URLs of web pages of the Office's website that provide statistics related to patents

URL to annual technical reports on patents:

<http://www.wipo.int/scit/en/atrs/>

<http://www.upv.sk/index2.php?lang=sk&idd=9&idd2=909>

URL to the Annual Reports of the Industrial Property Office of the Slovak Republic:

<http://www.upv.sk/index2.php?lang=en&idd=11&idd2=92>

II. Matters concerning the generation, reproduction, distribution and use of primary and secondary sources of patent information

Publishing, printing, copying (main types of publications of the Office in the field of patent information, etc.)

Main types of official publications:

Patent documents (codes of documents according to the WIPO ST.16):

- Published patent applications (A3)
- Patent specifications (B6)
- Supplementary protection certificates (without code)
- Translations of patent claims of European patent application with designation for SK (T1)
- Corrected translations of patent claims of European patent application with designation for SK (T2)
- Translations of European patent specification with designation for SK (T3)
- Corrected translations of European patent specification with designation for SK (T4)
- Translations of modified wording of European patent specification with designation for SK (T5)
- Corrections of patent documents (A8, A9, B8, B9, U8, U9, T8, T9)

Official Gazette "Vestník ÚPV SR"

Patents and utility model information forms part of the Official Gazette - "Vestník ÚPV SR", covering all industrial property rights in one publication. Paper form issued monthly is published in standard size A4, paperback and usually in cca 300 pages. In 2007 the Gazette had a circulation of 250 copies, of which 83 were distributed monthly by subscription. Other copies were sent free of charge to patent information centres and contact and information points of the IPO, to information and consulting sites INNOINFO, within the frame of industrial property information exchange to foreign offices and as the statutory copies according to the act as well. Electronic form of Official Gazette, available to the public in the Internet free of charge, contains searchable data, which are regularly updated.

The following numbers of documents were published in the Official Gazette in 2007:

167 published patent applications
593 patent specifications
287 utility models
17 application for granting SPC's
14 granted SPC's
6 translations of patent claims of European patent application with designation for SK
1491 translations of European patent specification with designation for SK
17 corrected translations of European patent specification with designation for SK

Distribution

The Office distributed Slovak patent specifications to patent information centres and contact and information points of the IPO to build the territorial fund of the national patent documentation and to the IPO of the Czech Republic within the frame of exchange as well. Slovak patents published on ESPACE-PRECES CD-ROM are being distributed by the Hungarian Patent Office to foreign patent offices within the frame of mutual patent information exchange. The Official Gazette "Vestník ÚPV SR" has been distributed within the frame of mutual exchange to 30 countries including organizations EPO and WIPO last year.

Main types of announcements of the Office in the field of patent information

The Gazette contains patent announcements including the translations of European patents with designation for SK, supplementary protection certificates announcements and utility model announcements arranged in following main chapters:

PATENTS

- list of published patent applications (numerical series with classification symbols)
- bibliographic data and abstracts of published patent applications with an image, where available (arranged according to the International Patent Classification)
- list of granted patents (numerical series with classification symbols)
- bibliographic data of granted patents (arranged according to the International Patent Classification)
- suspended patent application procedures
- patents lapsed by reason of abandonment
- lapsed (expired) patents
- patents lapsed by reason of failure to pay renewal fee
- refused patent application
- revocations of patents
- partial revocations of patents
- assignment and transfer of the rights to patents and patent applications
- the changes of the rights of disposal to patents and patent applications (lien)
- the changes of the rights of disposal to patents and patent applications (termination of lien)
- the license offers
- license contracts registered in the register
- the termination of force of the license contracts
- compulsory licenses
- patents registered in the register after declassification
- corrections of names, addresses, dates and mistakes

UTILITY MODELS

- list of registered utility models (numerical series with classification symbols)
- bibliographic data of registered utility models (arranged according to the International Patent Classification)
- list of registered utility models with the extended term of validity (numerical series with classification symbols)
- bibliographic data of registered utility models with the extended term of validity (arranged according to the International Patent Classification)
- abandoned utility models
- lapsed (expired) utility models
- utility models lapsed by reason of failure to pay renewal fee
- cancelled utility models
- partially cancelled utility models
- assignments of the rights to utility models

- the changes of the rights of disposal to utility models (lien)
- the changes of the rights of disposal to utility models (termination of lien)
- license contracts registered in the register
- compulsory licenses
- the termination of force of the license contracts
- registered utility models in the register after declassification
- corrections of names, addresses, dates and mistakes

EUROPEAN PATENTS

- list of translations of patent claims of European patent applications with designation for SK (numerical series with classification symbols)
- bibliographic data of translations of patent claims of European patent applications with designation for SK (arranged according to the International Patent Classification)
- list of corrected translations of patent claims of European patent applications with designation for SK (numerical series with classification symbols)
- bibliographic data of corrected translations of patent claims of European patent applications with designation for SK (arranged according to the International Patent Classification)
- list of translations of European patent specifications with designation for SK (numerical series with classification symbols)
- bibliographic data of translations of European patent specifications with designation for SK (arranged according to the International Patent Classification)
- list of corrected translations of European patent specifications with designation for SK (numerical series with classification symbols)
- bibliographic data of corrected translations of European patent specifications with designation for SK (arranged according to the International Patent Classification)
- list of translations of the modified wording of European patent specifications with designation for SK (numerical series with classification symbols)
- bibliographic data of translations of the modified wording of European patent specifications with designation for SK (arranged according to the International Patent Classification)
- suspended procedures of the European patent applications by reason of withdrawal
- conversions of the European patent applications to the national applications
- abandoned European patents
- revocations of European patents
- partial revocations of European patents
- lapsed (expired) European patents
- European patents lapsed by reason of failure to pay the maintenance fees
- Assignment and transfer of the rights to European patents and European patent applications
- the changes of the rights of disposal to European patents and European patent applications (lien)
- the changes of the rights of disposal to European patents and European patent applications (termination of lien)
- the license offers
- license contracts registered in the register
- the termination of force of the license contracts
- corrections of names, addresses, dates and mistakes

SUPPLEMENTARY PROTECTION CERTIFICATES

- bibliographic data of published applications for granting the supplementary protection certificates (arranged according to the document numbers)
- bibliographic data of granted supplementary protection certificates (arranged according to the document numbers)
- suspended procedures of applications for granting the supplementary protection certificate
- refused applications for granting the supplementary protection certificate
- assignments of rights for applications for granting the supplementary protection certificate
- lapsed supplementary protection certificates
- revocations of supplementary protection certificates
- assignments of rights for the supplementary protection certificate
- changes in data of applicants for granting the supplementary protection certificate
- changes in data of owners of the supplementary protection certificates
- corrections of names, addresses, dates and mistakes

Mass storage media used (paper, microforms, optical storage, etc.)

Patent documents are available in paper form in the Office's library and, in addition, patent specifications are available also in electronic form in the Office's web site as well as on ESPACE-PRECES CD-ROM (Patents from the Region of Eastern and Central European States). As an index to this fulltext CD-ROM is ESPACE ACCESS PRECES (complete bibliographic information) is used.

Word processing and office automation

Word processing and office automation is ensured by application over the patent and utility models database.

(New) techniques used for the generation of patent information (printing, recording, photocomposing, Optical Character Recognition (OCR), etc.)

MS Office 2003, Photoshop 7.0.1 CZ, FineReader 8.0, Adobe Acrobat 8. Professional SK, Agfa FotoLook 3.6, Quark Xpress Passport 7.2, Corel Draw 11. SLEX99 – Lexicon of Slovak Language are used for the data processing; the photocomposing and printing is carried out by the Office.

The Desk-Top Publishing technology is used for data and images processing, for the Gazette and first pages of the patent documents.

URLs of web pages of the Office's website that provide access to online publication of patent documents and gazettes, and to other primary and secondary sources of patent information, including patent publication servers and download of bulk patent data

@SKIPO - Electronic Slovak Industrial Property Office Portal
<http://www.upv.sk/eskipo.php?lang=en&idd=99>

@SKIPO is an integrated system of e-services that offers access to on-line databases, on-line services and @filling room. The purpose of the portal of the Office is to provide the public with all our e-services from one place and in transparent manner and gives the possibility to communicate electronically with the Office. The effort of the Office is to make available as much information in electronic form, which are placed on internal network now, as possible. All data from databases are provided free of charge.

ON-LINE DATABASES
<http://www.upv.sk/eskipo.php?lang=en&idd=2>

IPO SR makes accessible various databases on its homepage. Most frequently used databases are

- "Data extracted from Registers" also called as "Webregisters", give public access to information from national registers of industrial property rights and are daily updated <http://registre.indprop.gov.sk/registre/?lang=en>
- "Patent documents IPO SR" - patent documents SK and CS include in addition bibliographic data also complete patent files and are regularly updated <http://www.upv.sk/eskipo.php?lang=en&idd=12>
- "Patent classifications" contains Slovak version of the IPC 7 (fully searchable) and of the IPC 2006 core level (in PDF only), links to other classifications systems for classifying patents and utility models used in the world and other useful information <http://www.upv.sk/eskipo.php?lang=sk&idd=13&idd2=1302>
- "Official Gazette" enables looking on an single issue, searching in the selected issue and searching in all issues <http://www.upv.sk/eskipo.php?lang=en&idd=14>.

In the part "Foreign on-line databases" are available links to most frequently used on-line databases <http://www.upv.sk/eskipo.php?lang=sk&idd=19>.

ON-LINE ORDERS
<http://www.upv.sk/eskipo.php?lang=en&idd=1&idd2=>

IPO SR makes available electronic order forms on Official Gazette, magazine Intellectual Property and E-zine, publications of the IPO SR and IPO CZ, Annual Reports, patent documents and searches (see the part "Products and services", chapter VI).

III. Matters concerning abstracting, classifying, reclassifying and indexing of technical information contained in patent documents

Abstracting, reviewing, translating

Abstracts printed on the first pages of patent documents as well as a part of official announcements are revised and in case of need corrected by the Office's experts before publication of application. Abstracts appear only in case of patent application publications in the Official Gazette. The English translation of abstracts are being sent to the EPIDOS for the ESPACE-PRECES CD-ROM production and publication in the database esp@cenet.

Classification¹, preclassification² (if applicable), and reclassification³ activities; Classification system used, e.g., International Patent Classification (IPC), other classification (please indicate whether or not patent documents are classified by your Office and, if so, which classification is used)

Patent applications were classified, preclassified (i.e. preliminarily classified at the subclass level) and reclassified by Office's experts according to the core level of the eighth version of the International Patent Classification. The WIPO Standards ST.8 and ST.10/C were also used for these purposes. Classification of applications was conducted before the publication of the application, while final specification of the classification symbol can be done during the search of the application. Patent applications were preclassified by allotting subclass symbols to route a patent application to the appropriate examiner or for statistical purposes. Reclassifying of applications according to the current edition of the IPC was carried out after entry of a new edition of the IPC core level into force.

An administrative system for patent applications was fully upgraded with new features of the reformed IPC-2006.

The IPC 2006 core level was used in the Office for classification the Slovak patent documents.

Hybrid system indexing

By reason of application of the reformed IPC core level for indexing of technical information contained in patent documents the hybrid systems of the IPC are not used.

Bibliographic data and full-text processing

The WIPO Standard ST. 9 is used for patent and utility model bibliographic data coding in all relevant outcomes or records. All bibliographic data are being processed in electronic database form. The fully searchable data are updated and made available to the public daily in the Internet.

Digitalisation

In 2007, the Office continued in regular monthly digitalisation of new entries of national patent documentation.

IV. Search file establishment and upkeep

File building

The patent documentation search file used by the patent examiners and the technical public contains patent documents from 26 countries, the EPO, the WIPO and the OAPI, patent gazettes from 33 countries, including the EPO and the WIPO and the non-patent literature (42 titles of technical periodicals and 8.927 titles of special literature).

Updating

Updating of patent documentation search file is performed regularly according to current technical possibilities.

Storage, including mass storage media

The basis of the patent fund forms the collection stored on the paper medium (cca 10 millions documents). However the majority of the patent documentation is currently received on electronic carriers. In 2007 the regular annual accession of optical discs reached 817 pieces of optical discs with full texts and bibliographic information concerning the patent documents.

Documentation from other offices maintained and/or considered part of the available search file

IPO SR is maintaining the patent documentation collection stored in paper form, which forms, as a part of PCT minimum documentation, the basis of search files within the range:

- from 1950 to 1992: the documentation DD (from 1958), DE (from 1951), CH (from 1944), FR (from 1945), GB (from 1967), PL (from 1963), SU (from 1941), US (from 1960) and the documentation EPO (from 1978) a WIPO (from 1978)
- from 1919 to the present: national documentation SK and formal CS
- from 1993 to the present: national documentation CZ

Since 1993 the Office has been receiving patent documents stored on optical discs from following countries: Austria, Belgium, Bulgaria, Denmark, Germany, France, Georgia, Italy, Japan, Canada, China, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Romania, Russia, Switzerland, Slovenia, Spain, Czech Republic, Ukraine, Hungary, United States of America, United Kingdom and from international organisations EPO, OAPI and WIPO.

In 2007, within the frame of mutual exchange, the IPO SR received patent and utility model gazettes, as a part of the available search files, from the following states and organizations: AT, AU, BA, BG, BR, CH, CZ, DE, EE, EG, ES, FI, FR, GB, HR, HU, IT, KG, LT, LV, MD, MK, NO, PL, PT, RO, RU, SI, SM, UA, US, EPO a WIPO.

V. Activities in the field of computerized and other mechanized search systems

In-house systems (online/offline)

The Office is keeping and creating national search database on granted patents, published patent applications and registered utility models, which serves for searches and purposes of proceedings on granting patents and registering utility models. Nowadays, selected data are also available through Internet.

It is possible to carry out searches according to bibliographic data in all the databases used for granted patents, published patent applications and registered utility models.

Following search CD-ROM are used through the local CD-ROM network by the Ultramet 2000 system:

ESPACE - ACCESS EP - A
ESPACE - ACCESS EP - B
ESPACE - ACCESS - EPC (EUROPE)
ESPACE - ACCESS - PRECES
ESPACE - ACCESS - RUSSIA
ESPACE - BULLETIN
PCT Gazette
PCT Impact
GLOBALPAT
PAJ
ESPACE - LEGAL
IPC CLASS version 7 (MPT 7)
IPC CLASS version 2006 (MPT 8)
Revision Concordance list between Core Level MPT 8 and Advanced Level MPT 8
WIPO Handbook
List of Blue sheets Espace CD ROM
ECLA Classification in PDF format
legal and economic information, encyclopedia and statistics
translating dictionaries

External databases

Searches carried out in the STN on-line service, access to EPOQUE, DERWENT, INPADOC, CAS and the like databases.

Using the esp@cenet Internet database and other free available databases of the national offices (e.g. Czech patent and utility models database) and WIPO.

Administrative management systems (e.g., register, legal status, statistics and administrative support)

The Office automation management system contains patents, European patents with designation for SK, utility models, supplementary protection certificates and PCT registry (data since 1993 – patents, data since 2003 - European patents with designation for SK, data since 1992 – utility models, data since 2002 - supplementary protection certificates and data since 1995 – PCT applications filed with IPO SR as a receiving office) using "INVENTIO" software.

Administrative management system based on Lotus Domino and Fabasoft eGov Suite.

Equipment used (hardware, including the types of terminal and network used, and software), carriers used

Equipment used:

LAN is built on base of the Cisco technology, Fast ETHERNET 1000/100/10 Mbit/s, WINDOWS 2003 Server; MS SQL Server 2005; workstations PC Pentium, Windows 2000, Windows XP.

Linux Red Hat Enterprise 4.0,
Informix Dynamic Server 10,
Citrix MetaFrame Presentation Server 4.0,
Ultraset – Ultra Console 2000

SAN HP MSA 1500 CS,
HP Storage Works MSL 5000 series library,
HP open view Storage Data Protector version A.05.50

VI. Administration of the industrial property office library, and information products and services available to the public (relating to facilities, e.g., for lodging applications, for assisting clients on searching procedures, for obtaining official publications and registry extracts)

Planning, administration, automation, security, buildings

In 2007, the Office's reading room has been visited by 1.383 users and 1.209 of it were from the public. In total there were provided 7.111 borrowings of patent and other literature made available to the public and 25.621 copies of patent documents for the manual and computer search purposes, as well as copies from technical periodicals and other associated and non-patent literature were made. In 2007 there were performed 154 patent searches, 2.658 trademark searches and 24 design searches based on 1.099 written and 69 personally requests.

The Office's reading room including the search workstation opens daily from 8:00 to 15:00 except the Wednesday (9:00-16:00).

All online services and other basic information are available via Internet address of IPO SR: www.upv.sk.

Collecting, acquisitions, preparation

In the last year were processed 5.617 patent documents in paper form and 817 optical discs containing full texts and bibliographic information relating to patent documents as well to made them available for search purposes. The entire acquisition of patent documents amounted to 1 630 955 documents, out of which 1 625 338 entries represented documents in electrical form. Other new entries, for instance Official Gazettes of the foreign offices (37) and miscellaneous associated literature, were processed on the monthly basis.

The patent literature (patent documentation and official gazettes) were acquired within the frame of mutual exchange and the non-patent literature mostly by purchase and by subscription or as a gift.

Collection management, preservation

A list of the complete patent documentation was regularly updated on the Office's web site.

Non-patent literature was processed, stored and made available according to librarian rules via in-house database system "Knižnica" to the staff.

Interlibrary lending, resource sharing, networks of patent libraries in the country

Patent Information Centres and Contact and Information Points

Since 2003 the Office has established 10 contact and information points, while four of them are the Patent Information Centres. They are located in state, regional and district libraries as well as in the Slovak National Library in Martin and Centre of Scientific and Technical Information in Bratislava. A list of centres and points is available on the Office's web site <http://www.upv.sk/index2.php?lang=en&idd=10&idd2=>

The main goal of patent information centres is to provide complex information services in the field of patent, trademark and industrial design information, search services, consultation and methodical assistance concerning the searching of information, making copies of required patent documents, printing records from electronic form etc. Every patent information centre serve as a contact and information point.

The main goal of contact and information points of the Office is to inform the public about where can apply for protection of the results of creative activity, and particularly to inform the general public about the existence of the national institution, which protects immaterial goods, industrial property.

The Office supported the activity of centres and contact and information points by regular sending Slovak patent specifications in paper also on optical discs (fulltext ESPACE-PRECEs CD-ROM, bibliographic data thereof on ESPACE ACCESS PRECEs) as well as announcements concerning industrial property rights in the Official Gazette form, all information materials and recourses made available to the public, publications published by Office, information pamphlets, documents and forms relating to applying for protection of industrial property rights, access to offices databases via Internet etc.

In co-operation with the European Patent Office, the Office secured participation of employees from three patent information centres in the PATLIB Conference held in Spanish Seville, where they were familiarised themselves with activities of similar PATLIB centres in the European countries and they acquired knowledge about the development of the patent information market. At the same time they got an opportunity to personally meet the professionals from the field of patent information.

In November in its premises the Office organized a two-day seminar "PATLIB centres in Slovakia" accompanied by a specialised workshop. The objective of this seminar was to inform the seminar participants about changes taken in the Office during the year and about the new things prepared for the following year and to discuss about the current topics relating to availability and utilisation of industrial property information in Slovakia. The workshop focused on provision of services to the public while making use of the publicly available information sources, especially the internet databases operated by the Office or by foreign offices. The seminar was enhanced by active presentations about the PATLIB centres in the premises in the State Scientific Library in Košice and in Centre of Scientific and Technical Information in Bratislava.

Information and consulting sites for innovations

The mission of the thirteen "innoinfo" centres operating in the regions of Slovakia is to orientate especially the small and medium sized entrepreneurs in the field of innovations and industrial property. " Innoinfo" centres are established in business incubators, regional consultancy and information centres, regional chambers of the Slovak Chamber of Commerce and Industry and at the Universities of technical orientation.

During the year 2007 the Office selected three university innoinfo centres out of the 13 innoinfo centres with the aim to take into consideration the specific needs and claims currently laid on the scientific-research activities of universities. The innoinfo centres in the Slovak Technical University in Bratislava, Technical University in Košice and the University of Žilina in Žilina should be transformed to so-called centres of technology transfers and their task will secure complex in intellectual property administration at universities and their workplaces.

Information services available to the public (including computerized services and search files contained in libraries remote from your Office and patent information posted by your Office on the World Wide Web)

The Office library provides following services to the public:

- methodical and consultation assistance for the public
- general information provided by Office's experts
- lending service (patent documents, Official Gazettes, special monographs, patent associated literature and reference literature) in the reading room
- interlibrary lending service
- international interlibrary lending service
- sale of special monographs and periodical publications ("Intellectual Property", Official Gazette "Vestník ÚPV SR" in paper) upon request or on the place
- reprographic services upon request or on the place
- sending of copies of patent documents upon request
- searches on state of the art, patent families, bibliographic data upon request in written or on-line form
- on-line searches in Office's search system, self-service during a personal visit
- monitoring of the state of selected technical fields upon request (permanent sending of documents)
- registry information provided in the reading room
- CD-ROM workstations available in the reading room

Patent information on the World Wide Web:

- general information
- information about Office activities (seminars, training courses, etc.)
- application guide and forms
- administrative fees
- relevant laws
- Annual Reports
- selected registry data
- patent specifications (meanwhile since 1993)
- Official Gazette
- order forms (searches, patent documents, Official Gazette, special literature)
- products and services
- 7-th edition of the IPC (fully searchable)
- core level of the IPC 2006 (in PDF only)
- patent classifications and related information
- annual technical reports on patent information (2002-2007)

Information Centre

The Office started the full operation of the Information Centre in January 2007 that is divided in two stages (Front Office a Back Office). The main goal of the Centre is to receive and to deal with the problems of the Office's clients and the public centrally. Within their professional consultancy activities, the Centre staff provides the public with the necessary IPR-related information, by telephone (+421 48 4300 131) or in writing – its e-mail is infocentrum@indprop.gov.sk. The Information Centre includes also "Helpdesk" providing information about electronic on-line filing.

Workplace of the IPO SR in Bratislava

Workplace of the Office, which was opened in 2004 in the building of the Ministry of Finance in Bratislava offered especially services concerning the searches in the fields of trademarks, designs and patents in the last year. In the workplace, there is a filing room and room for discussions and negotiations.

URLs of web pages of the Office's website for electronic filing of patent applications

The Office's on-line filing room enables filing of the European patent applications, international PCT patent applications and national patent applications in electronic form <http://www.upv.sk/eskipo.php?lang=en&idd=15&idd2=>. (For more information see the part „Medium allowed for filing application“, chapter VII).

URLs of web pages of the Office's website that provide information on business procedures such as: filing, publication, examination and grant procedures related to patents; opposition and appeal procedures related to patents; etc.

Webregisters

<http://registre.indprop.gov.sk/registre/?lang=en>

IPO SR makes accessible various databases on its homepage. Most frequently used databases are "Data extracted from Registers" also called as "Webregisters". Webregisters give public access to data extracted from patent, utility models, European patents, supplementary protection certificates (SPCs) registers, which are kept by the Office. Data concerning in particular pending patent, utility model and SPC applications, all filed applications or granted patents, SPCs and registered utility models in the register are daily updated.

URLs of web pages of the Office's website that provide a description of information products and services offered by the Office (e.g., patent search service(s) and patent databases), as well as information on how to access and utilize them

Products and services

Comprehensive information concerning the products offered by the Office and other relevant information relating to accession and utilization of the products are on <http://www.upv.sk/index2.php?lang=sk&idd=27>

- Official Gazette
- patent documents
- magazine Intellectual Property
- IPO SR and IPO CZ publications
- E-zine IPO SR
- on-line order forms
- price list

Basic information about following information services offered by the Office including the contact and the way of their utilization are on <http://www.upv.sk/index2.php?lang=sk&idd=28>

- patent documentation fund
- IPO SR patent reading room
- patent databases, information and searches
- permanent sending of patent documents
- orders of patent documents and technical publications
- on-line order forms
- price list

For more information relating to services offered by the Office, see the part "Information services available to the public", chapter VI.

VII. Matters concerning mutual exchange of patent documentation and information

International or regional cooperation in the exchange of machine-readable information, e.g., bibliographic data, abstract and/or full text information

Regional co-operation

In 2007 IPO SR continued in participation in the joint ESPACE®- PRECES CD-ROM project (patent specifications of BG, CZ, HU, LT, LV, PL, RO and SK).

International co-operation

Bibliographic data and abstracts of the published patent applications and granted patents in English were supplied to the EPIDOS database in electronic form.

In 2007 followed the mutual exchange of patent documentation and official gazettes between the IPO SR and other offices also international organizations, including the EPO and the WIPO.

Medium used for exchange of priority documents

Priority documents have been supplied to applicants on request in paper form.

Medium allowed for filing applications

Patent and utility model applications are filled in paper, fax or electronic form. The last two are to be added by original filing during the determined period.

Since April 2007 the IPO SR enables on-line filing of national patent applications. Until then the Office was receiving only European patent applications, European PCT applications and international PCT applications in electronic form. The applications can be filed through the eOLF software (product of the EPO) and through the PCT-SAFE software (product of the WIPO).

During 2007, 41 electronic national patent applications, 24 PCT and 3 EPA were filed. The Office continued the development of new applications for on-line filing of other industrial right subjects. At the beginning of 2008 the Office made available the application for on-line filing of utility model applications.

Information about electronic on-line filings was presented by the Office during two User's Days of Electronic Filing the Applications.

VIII. Other relevant matters concerning education and training in, and promotion of, the use of patent information, including technical assistance to developing countries (please indicate URLs of web pages of the Office's website wherever appropriate)

Training courses for national participants

THE COURSE INTELLECTUAL PROPERTY (<http://www.upv.sk/index2.php?lang=sk&idd=31>)

The Office's Institute for Education was established in year 2000, when the Ministry of Education of the Slovak Republic granted the accreditation to the IPO SR for a period of five years. In January 2005 the Office has obtained a new five-year period accreditation. The lecturers are university teachers, experts from practice and the IPO SR experts. An overall number of training lessons extends to 342 hours, out of which 227 hours are lectures and the remaining training hours are devoted to hands-on practical exercising and training.

The Intellectual Property course consists of four separate parts: module A: Intellectual Property and Copyright Law Essentials; module B: Creativity - Management of Creativity, Marketing and Economics; module C: Information in the field of Industrial Property Protection; module D: Industrial Property Law. In 2006 the course was attended by 52 participants, out of which 20 employees of the IPO SR.

Supporting activities (seminars, exhibitions, visits, advertising, etc.):

CONFERENCE (<http://www.upv.sk/index2.php?lang=sk&idd=31>)

Almost 60 participants took part in the sixth year of the Conference Intellectual Property in Slovakia, held on the occasion of the World Intellectual Property Day, the main topic of which were the national IP protection in the context of international IP developments. On this occasion, an open door day of the IPO was held, during which the Office opened its non-public premises to people. Excursion was connected with presentation of the Office and provision of information and consultancy services.

LECTURES AND SEMINARS (<http://www.upv.sk/index2.php?lang=sk&idd=31>)

In July 2006 the IPO SR in co-operation with the World Intellectual Property Organisation organized an international seminar on the strategic use of IP for economic and social development in Bratislava. The objectives of the seminar were to deliberate on strategic approaches to making use of IP as an effective tool for development and to ensure their integration into national development strategies and plans, depending on specific requirements.

In November the IPO SR joined the EU initiative to devote one week to celebrate science, innovation and creativity – so-called "European Science Week". On the occasion, the IPO SR presented translation of the WIPO publication "Learn from the Past, Create the Future: Inventions and Patents", held a meeting with the press representatives who had made extraordinary contribution to popularize the IP domain in Slovakia, and held II. Users' Day on electronic filing of international and European applications (the I. Users' Day was held in May).

In pursuance of specific requirements the Office provided for a variety of specialisation oriented groups the lectures, presentations and educational courses related to industrial property rights protection.

EXHIBITIONS (<http://www.upv.sk/index2.php?lang=sk&idd=30&idd2=3006>)

The IPO SR is continuously enhancing the public awareness on industrial property protection also by means of presentations of fairs and exhibitions. The IPO SR took part at 26th International Building Fair CONECO in Bratislava, at the 36th International Chemistry Fair INCHEBA in Bratislava, at the 13th International Mechanical Engineering Fair in Nitra, and the Exhibition of Innovations IENA 2006 in Nuremberg within a joint stand of the European Patent Offices: "Internationales Patent-Informationszentrum"

The public awareness on industrial protection is also enhanced by holding exhibitions in the internal premises of the IPO SR. Almost entire entrance premises of the IPO SR had been reconstructed to serve as an exhibition hall. In December the first exhibitor, the Slovak Technical Museum in Košice, installed an exposition called "the Personalities of Science and Technology in Slovakia". The exposition was prolonged due to success.

PUBLICATIONS (<http://www.upv.sk/index2.php?lang=sk&idd=27&idd2=2703>)

List of publications for sale in Slovak and Czech <http://www.upv.sk/index2.php?lang=sk&idd=27&idd2=2703>

Last year the Office released several publications. Besides the Intellectual Property in Slovakia Conference workshop VI included an adapted translation of the WIPO publication "Learn from the Past, Create the Future: Inventions and Patents" and information materials focused on a general mission of the Office, as well as new products and services provided by the IPO SR.

The trademark department processed the changes and prepared the translation of 2-volume 9th edition of the International Classification of Products and Services. Classification system is available in the Office, in the patent information centres, contact and information points of the IPO SR and „innoinfo“ since January 2007.

Main patent and industrial property information magazines/journals published in the country or region of the Office

JOURNAL (<http://www.upv.sk/index2.php?lang=sk&idd=27>)

Awareness of the public in the field of intellectual property is increased also by the professional magazine INTELLECTUAL PROPERTY magazine ("Duševné vlastníctvo") issued quarterly by the Office.

12 editions of the E-zine IPO SR e-mail magazine were released last year. The magazine in electronic form released regularly each month consists of permanent sections with information from the IPO SR, the world, monitoring of periodicals, selected information from the separate editions of the Intellectual Property Magazine and not missing was also the knowledge contest in the area of science and technology, receiving much acclaimed by E-zine readers.

X. Other relevant matters

1.	Classification is allotting one or more classification symbols (e.g., IPC symbols) to a patent application, either before or during search and examination, which symbols are then published with the patent application.
2.	Preclassification is allotting an initial broad classification symbol (e.g., IPC class or subclass, or administrative unit) to a patent application, using human or automated means for internal administrative purposes (e.g., routing an application to the appropriate examiner). Usually preclassification is applied by the administration of an office.
3.	Reclassification is the reconsideration and usually the replacement of one or more previously allotted classification symbols to a patent document, following a revision and the entry into force of a new version of the Classification system (e.g., the IPC). The new symbols are available on patent databases.
