V. PROMOTION ACTIVITIES AIMED TO SUPPORT USERS IN ACCESS AND EFFICIENT USE OF TRADEMARK INFORMATION

Office's library (if deals with trademark information): equipment, collection management, network of libraries in the country, cooperation with foreign libraries

The Patlib Network was founded by the European Patent Office but PATLIB UK is autonomous and driven by its members and the UK Intellectual Property Office (IPO).

PATLIB UK is a network of 16 libraries around the UK that offer help and support on intellectual property as well as other business topics. They are based in local libraries and therefore open to any member of public that wishes to attend.

One of the key offerings of the network is access to support in intellectual property searching. All centres have a minimum requirement to supply assisted searches to businesses, which includes the UK trade mark database, TMview. The centres also assist with classification searching through Tmclass. Many take this further however by providing lessons to guide businesses on completing basic initial searches.

Training to deliver these services has been supplied by the IPO through the IP Master Class programme as well as ongoing individual training sessions as needed.

In addition to the guided searches some Patlib centres also offer a commercial trade mark searching service. This is at a low cost and is available to anyone; it is regularly used by businesses and individuals as well as IP Professionals.

As the centres are located within local libraries they make the most of free databases such as TMview and Tmclass and due to lack of funding do not pay for any additional databases or tools. Our office, through the PATLIB UK Network and the British Library, takes part in numerous exchange programmes with other patent libraries around the world as in previous years.

Publications related to different business procedures and trademark information sources available to users, for example, books, brochures, Internet publications, etc.

Our main office is in Newport, South Wales, where the public can file applications and discuss possible IP protection with an IPO Advisor. In addition, we also have a front Office in London where customers can file applications.

Cooperation with universities, technology and innovation support centres, etc.

Our Business Outreach continues to raise awareness of IP, helping businesses reach an informed decision on how to use, manage, and enforce their IP to its full potential. This is done via a portfolio of business tools including mobile and online resources, seminars, workshops/training and working with partners to deliver broader dissemination and understanding of IP: <https://www.gov.uk/government/publications/intellectual-property-for-business>

Education and training: training courses, e-learning modules (URLs), seminars, exhibitions, etc.

We continue to communicate IP awareness to young people from primary through to secondary school. We have developed a range of curriculum-linked education resources to raise awareness of innovation, creativity and intellectual property in partnership with UK Music, Aardman Animations and the Industry Trust.

Campaigns are supported through crackingideas.com an online hub to support UK and devolved Governments' curriculums plus advice and guidance for schools on intellectual property. We have introduced a new online tool for Universities (IP Tutor) helping students and lecturers understand intellectual property rights: <https://www.gov.uk/government/publications/ip-in-education/ip-in-education>

Other activities

All marketing and PR is carried out within the External Communications team and we are achieving great coverage particularly on our social networking platforms.
