

IPO GREEN WEBINARS

Autumn Series (October – December)

All WIPO Member State IP Offices are cordially invited to a series of webinars hosted by WIPO GREEN as part of our IPO GREEN initiative. Launched in March this year, the IPO GREEN initiative supports IP Offices in all regions to enact policies and programs that advance green technology innovation.

During the webinars, IP Offices will present on their experiences with their national green programs, trends, analysis and new initiatives. There will be ample time for discussion. In a global network, it is difficult to accommodate all time zones. We have tried to optimize the timing for as many as possible, but the webinar recordings will be made available on the [IPO GREEN homepage](#).
